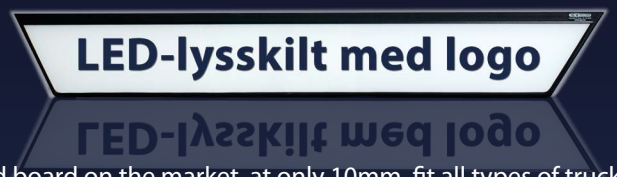
GV Lysskilt®



Slim LED nameboards that fit the specified vehicle.

The slimmest LED illuminated board on the market, at only 10mm, fit all types of trucks, buses and vans.

Quick and simple mounting.

GV Flexi+®

GV Flexi+ are slim and elegant LED-boxes with room for storage of up to 4 sign plates in the box. This solution makes it easy to change the messaging in the front. The box has a total depth of only 36mm - with a more rounded design than earlier.

GV Flexi+ exist in 14 different sizes fitted to most trucks.

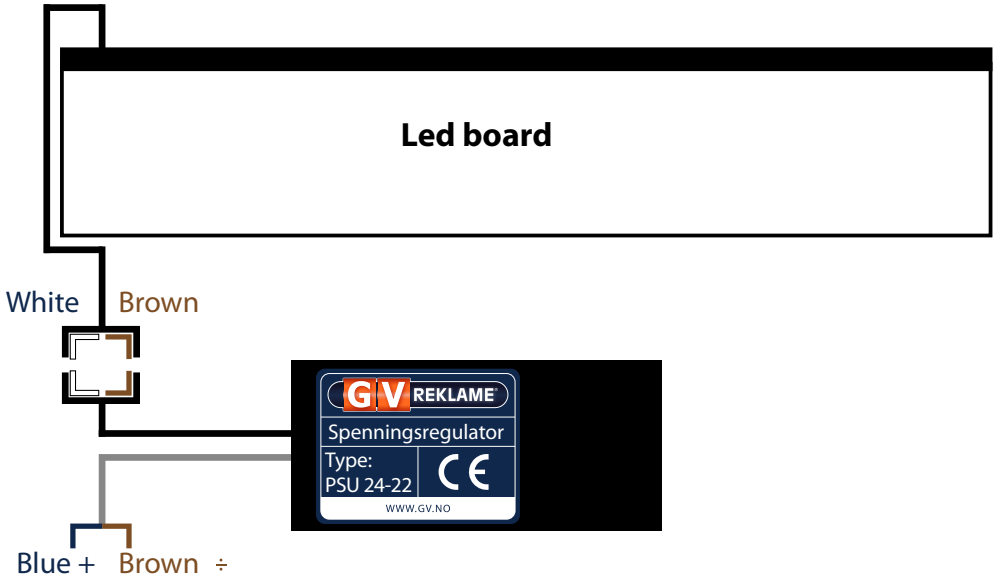
The original - Market leader - Quality

GV Flexi+

Installation Description

The voltage regulator (PSU) HAS to be placed inside the truck (in a dry place).

1. The black cable is mounted colour to colour against the black cable from the led board
2. The grey cable with brown and blue wire is mounted to the vehicle's el system 24V

- Blue cable is +
- Brown cable is ÷


N.B. Do not install the led board to power without the voltage regulator PSU
