

VAN CONVERSIONS

Customisable van conversions tailored to your needs. Our expert team crafts solutions like ply lining, racking, and more, ensuring your operation runs smoothly without unnecessary extras or added weight.

Van Conversions by Kuda Automotive.

Here at Kuda we offer a full range of Van Conversion options to suit your particular needs. From simple ply lining and load restraint options to speed-lining, racking and anti-bacterial coatings, custom built false bulk heads, ventilation options, lighting packages and more, we offer the complete package for fleets and private operators alike.

Our in house team of specification engineers and fitting technicians are able to discuss and tailor all of the various options exactly to your needs and be as flexible as possible to create a build which actually suits your operation, whilst not paying for unnecessary equipment or, more importantly, taking up extra weight with pre-specified conversions or stock vehicles.

Our Van Conversion Services include;

- Interior Lining (Ply, Plastic and more)
- Hard wearing flooring options and coatings
- Load restraint Systems
- Racking Systems
- Bespoke custom bulk heads and load bay sectioning.
- Interior Lighting packages
- Exterior Lighting such as beacons, strobes and work lights
- Roof and Floor Ventilation
- Electrical Packages for tool and equipment charging
- Welfare and comfort items, such as Handwash stations, fridges and microwaves.
- MirrorShield mirror protection.
- Sign writing and Chapter 8 chevron kits.
- Tow bars, steps and rear sensors.
- Camera systems.

VEPRO

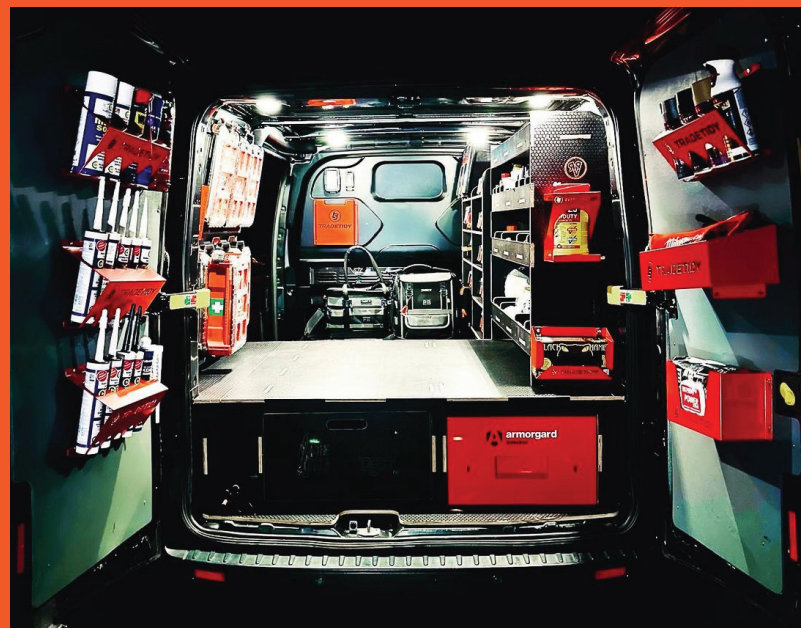

Premium brand partnerships.

We have teamed up with some of the leading brands in the van conversion market to bring not only our usual high level of service and support, but also the leading products and latest advancements when it comes to van conversions and accessories.

Tailored Solutions.

Of course, we can do "off the shelf", so can many others, we have combined over 30 years of commercial vehicle accessory manufacture and supply experience, with extensive research and development within the LCV market to ensure that we can deliver a truly bespoke solution to any customer should they require it.

Fully fitted options at Kuda or your location.

Our team of trained, mobile engineers are available across the UK to install over 90% of the products we offer, on-site, at your premises as well as at our fleet fitment facility in Ipswich, Suffolk.

They are fully equipped in a modern fleet of vans, with the full compliance training and insurance. Our engineers can travel almost anywhere in the country (pre-booking required), either bringing the products to be fitted with them, or meeting products previously delivered by our carriers.
