Automotive - 24V Air Conditioners

Sleeping Well Back Plus

Sleeping Well is the world's first truck air conditioner that works even when the engine is not running, significantly reducing energy consumption.

Sleeping Well Back Plus is the more powerful version of Sleeping Well Back: this wall-mounted air conditioner provides even more cooling in the sleeping area of the cabin by offering a maximum power of up to 1600 W*.

In this model, too, the evaporating unit is mounted high on the inside rear sleeper wall. The maximum air-conditioning performance can thus be achieved even with the sleeper curtains closed. The connection pipes are adjustable in length. The external control unit is water-proof.

In some cases, it is possible not to drill holes in the cabin to let the connection pipes go through. Almost aesthetically invisible, as the condensing unit is placed on the back of the cabin.

*as an example, this power is able to cool a room of 20 m².

Technical features

Compressor	Samsung, single DC 24V	Voltage (V)	DC 24
Refrigerant gas	-	Cooling power (W)	1100 - 1600
24V consumption car (amp/h)	11,5	24V consumption max (amp/h)	21
External unit dimensions (HxWxD) (mm)	702x466x187	Evaporating unit dimensions (HxWxD) (mm)	259x631x113
Net weight (kg)	22,3	Number of fans	4
Air flow (m3/h)	450	Remote control	Yes
Timer	Yes	Battery protection	Yes
Certifications	CE, E-Mark
