

IMPORTANT

PRODUCT SAFETY INFORMATION

TruckChef

**Read the instruction manual carefully before using the microwave.
Ensure that you understand all the safety precautions and warnings provided in the manual.**

**Only use the microwave when the truck is parked or stationary.
Do not use the microwave while the vehicle is in motion.**

**Ensure that the microwave is properly installed and secured to
prevent it from moving or falling during transit.
Check the mounting brackets regularly to ensure they are secure.**

**Use only microwave-safe dishes and containers.
Do not use metal containers or utensils as they can cause sparks and damage to the microwave.**

**Do not use the microwave if it appears damaged or malfunctioning.
Contact the manufacturer immediately for assistance.**

Do not operate the microwave with an empty cavity as this can cause damage to the microwave.

**Do not attempt to repair or modify the microwave yourself.
Only trained professionals should perform any repairs or modifications.**

**Keep the microwave and surrounding area clean and free from debris.
This can prevent fire hazards and ensure the microwave operates efficiently.**

**Do not leave the microwave unattended while in use.
Always monitor the microwave while it is operating.**

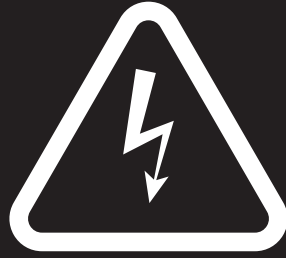

**In case of any emergency, such as a fire or electric shock,
immediately disconnect the power source and contact emergency services.**

Following these safety guidelines can help ensure safe and efficient use of this product.

Further information, RMI requests and service procedures can be requested from the manufacturer.

RISK OF ELECTRIC SHOCK

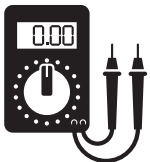

Important Install Information

Install of this product should be carried out by a **qualified auto-electrician** or other trained engineer, familiar with the vehicle manufacturers body builder guidelines.

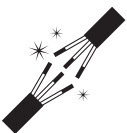

You may need specialist equipment or items to connect this product to your vehicle. We urge you to check you have everything required before fitting.

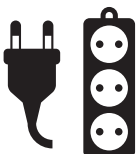

Power for this product must be taken from a **fused, 40amp 24 volt supply**. This should be done so in line with the vehicle OEM's bodybuilder electrical connection guidelines

Ensure the correct PPE is worn and the vehicle is totally **isolated from all electrical power** before working on it. We recommend batteries are disconnected.

Never touch, or leave bare / stripped wires due to the risk of electrical shock. The capacitors inside the microwave will store power even when switched off or disconnected.

Never try to connect any other electrical equipment to this appliance or it's built in power supply. This is not safe to do so and will void the products warranty.
